

World Class Digital Signal Processing

ChannelStrip is the recognized leader in console style channel strip audio processing for digital audio workstations. As the first plug-in to offer the combination of exceptional audio quality, incredible DSP efficiency and a comprehensive user interface, ChannelStrip lets users work as efficiently and interactively as they would with a dedicated, world-class mixing console. ChannelStrip comes with more than 100 presets included to help you get your mix started. Use the presets to compress your drums, EQ your vocals, get your sessions ready for mastering and much more.

With ChannelStrip you get an unparalleled EQ, Gate, and Compressor, all in one easy to use interface.

ChannelStrip is the critical mixing tool for thousands of top engineers and producers worldwide, and is available in three versions:

ChannelStrip for GarageBand: Full functionality at a lower price, only runs in GarageBand. The perfect starter plug-in.

ChannelStrip Native: One license lets you run CS on any Native host in AU, VST and RTAS formats.

Channelstrip TDM: Harness the power of ChannelStrip on your top of the line ProTools system.
